AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A bi-directional remote controller comprising:

means for requesting a guidance on a data broadcasting, wherein the requesting means is a guidance setting button key on the bi-directional remote controller;

the bi-directional remote controller for receiving guidance information provided from an outside of the bi-directional remote controller in response to the request; and

means for notifying the received guidance information,

wherein the guidance information is extracted from the data broadcasting and wherein the guidance information is used for a user to operate at least one function being included in the data broadcasting.

2. (Cancelled)

3. (Cancelled)

4. (Original) The bi-directional remote controller according to claim 1, wherein the guidance information indicates the location of a button key to be pushed.

5. (Original) The bi-directional remote controller according to claim 1, wherein the guidance information indicates the location of a button key allowed to be pushed.
